Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) Declaration

REACH is the new “European Parliament Directive EC 1907/2006” concerning the Registration, Evaluation, Authorization and Restriction of Chemicals. It became effective on 1st June 2007 and replaces a number of European Directives and Regulations with a single system.

UltraVolt (UV) has an obligation, under the Regulation, to notify its customers and provide the data on any SVHC materials in its products, as well as to update that information if conditions change.

Based on estimated weight of UV components as well as material data from component and material suppliers, our products do not contain or have less than the 0.1% of the REACH criteria’s Substances of Very High Concern materials as published by European Chemicals Agency (ECHA) on October 9, 2008 and as updated June 20, 2011

The signatory of this Declaration certifies that they are a company official authorized to make this declaration on behalf of the company.
